Re: ACT/047/010  
Bonanza Mining Operations

**RECEIVED**

FEB 15 1985

**DIVISION OF OIL  
GAS & MINING**

Dear Ms. Linner:

The following is American Gilsonite Company's (AGC) response to the stipulations of the tentative approval for the Bonanza Mine and Reclamation Plan of January 23, 1985.

### Stipulation M-10(14)-1-TLP

The redistribution of topsoil for reclamation purposes will not be conducted in excess of thirty (30) days prior to seeding. Topsoil will not be spread when moisture levels of the soil would be likely to increase compaction.

### Stipulation M-10(14)-2-TPL

American Gilsonite will conduct a survey to determine the average thickness and volume of insitu (substate) material available at each individual minesite. Results will be recorded on the individual minesite inventories in Appendix I. Results and updated inventory sheets shall be provided to the Division by October 1, 1985.

### Stipulation M-10(14)-3-TPL

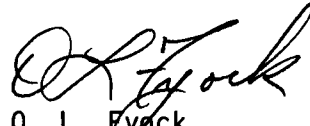

American Gilsonite will submit complete soils analysis and a revegetation plan sixty (60) days prior to borrow operations should it become necessary for fire control of open veins.

Also enclosed is Page 6d, revised February 13, 1985, and Map 2, revised February 13, 1985. Map 2 now has all State and Federal leases of which AGC plans development within the next five to ten years. The UDOGM will be notified annually in the normal procedure prior to development.

The bond for \$500,000 is enclosed. I will need an executed copy.

Should you have any questions, please contact me at the above address.

Sincerely,

O. L. Fyock
